ÖZKAR HYDRAULIC

In **1983**, Ulvi Özelçi laid the foundations for Özkar Hidrolik in the Hasköy district of Istanbul. Starting in a 15 m² area, Özkar Hidrolik began providing technical support and hydraulic system technical drawing services.

In **1987**, taking its first step towards growth, the company moved to a new production facility covering 100 m². In addition to technical consultancy services, the company introduced its first Universal lathe and Universal drill machines to start production activities. After the first production of hydraulic cylinders, they expanded their production areas to include Hydraulic Power Systems and Hydraulic Presses in their product range.

In **1995**, with the aim of increasing production capacity, Özkar Hidrolik moved to a new 250 m² workshop. They added more Universal lathe and drill machines and included the first milling machine in their machinery park to increase production capacity.

In **2000**, they realized their first block cylinder production in response to the needs of the mold sector.

In **2008**, the company added its first CNC milling and turning machines to its production equipment. The production processes could now be carried out with higher precision, quality, and without errors.

In **2014**, our founder Ulvi Özelçi passed away. As the second generation, his sons Murat Özelçi and Emre Özelçi continued to develop and sustain Özkar Hidrolik in the light of their father's knowledge and experience.

In **2015**, Özkar Hidrolik made a major investment and moved to its new 600 m² facility located in İkitelli Organized Industrial Zone. The same year, the company achieved its first export.

By **2021**, with the aim of increasing production capacity, they moved to a new 1500 m² production facility equipped with state-of-the-art machinery and infrastructure.

As of **2022**, Özkar Hidrolik, with 15 employees, 7 CNC machines, exports to 5 different countries, and high production capacity, continues to carry the legacy handed down by Ulvi Özelçi confidently into the future."

KALİTE / QUALITY

Kaliteli üretim prensibimiz doğrultusunda imalatlarımızda düşük maliyet odaklı değil en doğru ve uygun hizmeti sunmak için çalışıyoruz. Ürünlerimizin tüm aşamalarda kullanılan hammaddelerinden en küçük yardımcı malzemelere kadar en doğru ürünü tercih ederek imal ediyoruz.

Kalite standartlarımızı korumak için tüm üretim proseslerini kendi fabrikamızda yürüterek son kullanıcıya ulaştırıyoruz. Ürün takip sistemimiz sayesinde sonsuz yedek parça temini sağlıyoruz. Müşteri ilişkilerimizin temelinde kurduğumuz güvenilir ve sürekli ilişkiler yatmaktadır.

Dünya standartlarında yapmakta olduğumuz üretimlerimizi kalite belgelerimiz ile tescilliyor ve yılların tecrübesi ile size ulaştırıyoruz.

We work in line with our principle of high-quality production, aiming not for low-cost solutions but to provide the most accurate and suitable services. From the raw materials used in all stages of production to the smallest auxiliary materials, we carefully select the right products for manufacturing.

To maintain our quality standards, we conduct all production processes in our own factory and deliver them directly to the end-users. Thanks to our product tracking system, we ensure an endless supply of spare parts. Our customer relationships are built on trust and commitment, fostering reliable and long-lasting connections.

Our productions, carried out in accordance with world standards, are certified by our quality documents, and with years of experience, we deliver them to you.

TECRÜBE EXPERIENCE

40+ yıllık tecrübemizi en kaliteli ve doğru ürünü üretmek için kullanıyoruz.

We leverage our 40+ years of experience to manufacture the highest quality and most accurate products.

TÜRK MALI MADE IN TURKEY

%100 yerli sermaye ile ülkemize katma değer sağlamaya devam ediyoruz.

We continue to contribute value to our country with 100% domestic capital.

ÖZEL ÜRETİM CUSTOM PRODUCTION

Firmanızın ihtiyaçları doğrultusunda özel tasarım ve üretim yapıyoruz.

We specialize in custom design and production tailored to your company's needs.

TÜM DÜNYADA WORLDWIDE

Türkiye'de üretiyor tüm Dünyaya ihraç ediyoruz.

We produce in Turkey and export worldwide.

Kalite asla bir tesadüf değil, daima akıllı bir gayretin sonucudur. / Quality is never a coincidence; it is always the result of intelligent effort.

BLOK SİLİNDİR / BLOCK CYLINDER

GENEL ÖZELLİKLER - GENERAL CHARACTERISTICS

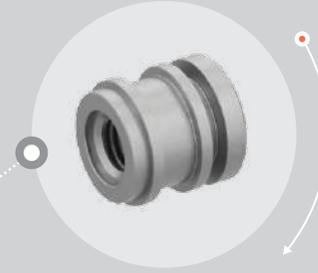

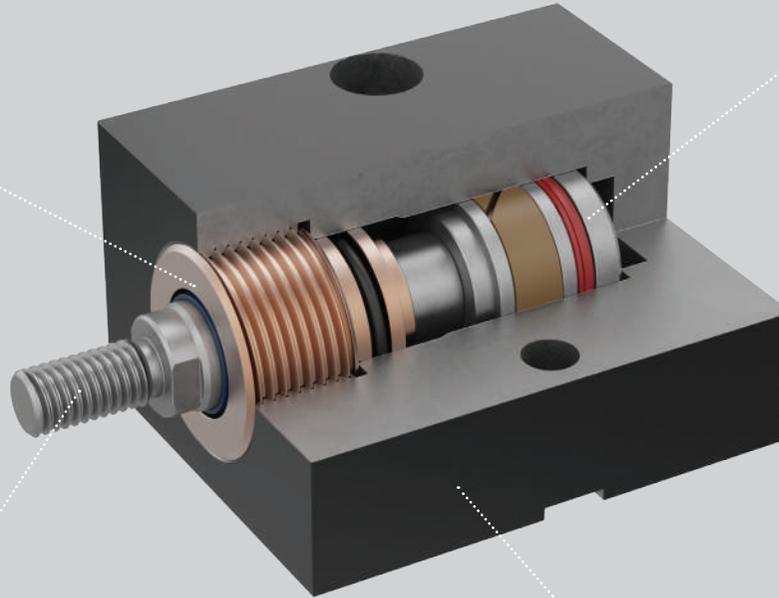

GGG50 Ön kafa malzemesi sayesinde mükemmel yataklama ve basınç dayanımı.

Yüksek kalite sızdırmazlık elemanları Nutring, Toz keçesi ve O-ring NBR, Fkm, Pu ve Silikon olarak tercih edilebilmektedir.

GGG50 Front head material excellent bedding and compressive strength.

High quality sealing elements Nutring, Dust seal and O-ring Nbr, Fkm, Pu and silicon can be preferred.

GGG50 Piston malzemesi sayesinde minimum çalışma yüzeyi hasarı.

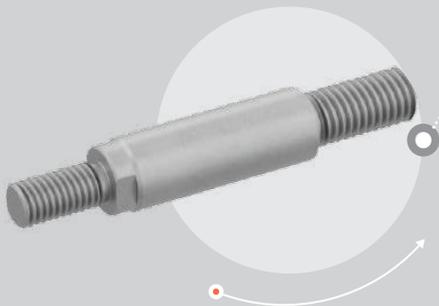

Bronzdestek yataklama.

Yüksek basınç ve darbeli çalışmalara özel üretilmiş Omegad Piston.

NBR, Fkm, Pu ve Silikon olarak tercih edilebilmektedir.

GGG50 Piston specially produced for high pressure and impact works.

Nbr, Fkm, Pu and Silicon can be preferred.

Yüksek kaliteli krom kaplı ve taşlanmış mil.
Uzun ömürlü sürtünme dayanımı.

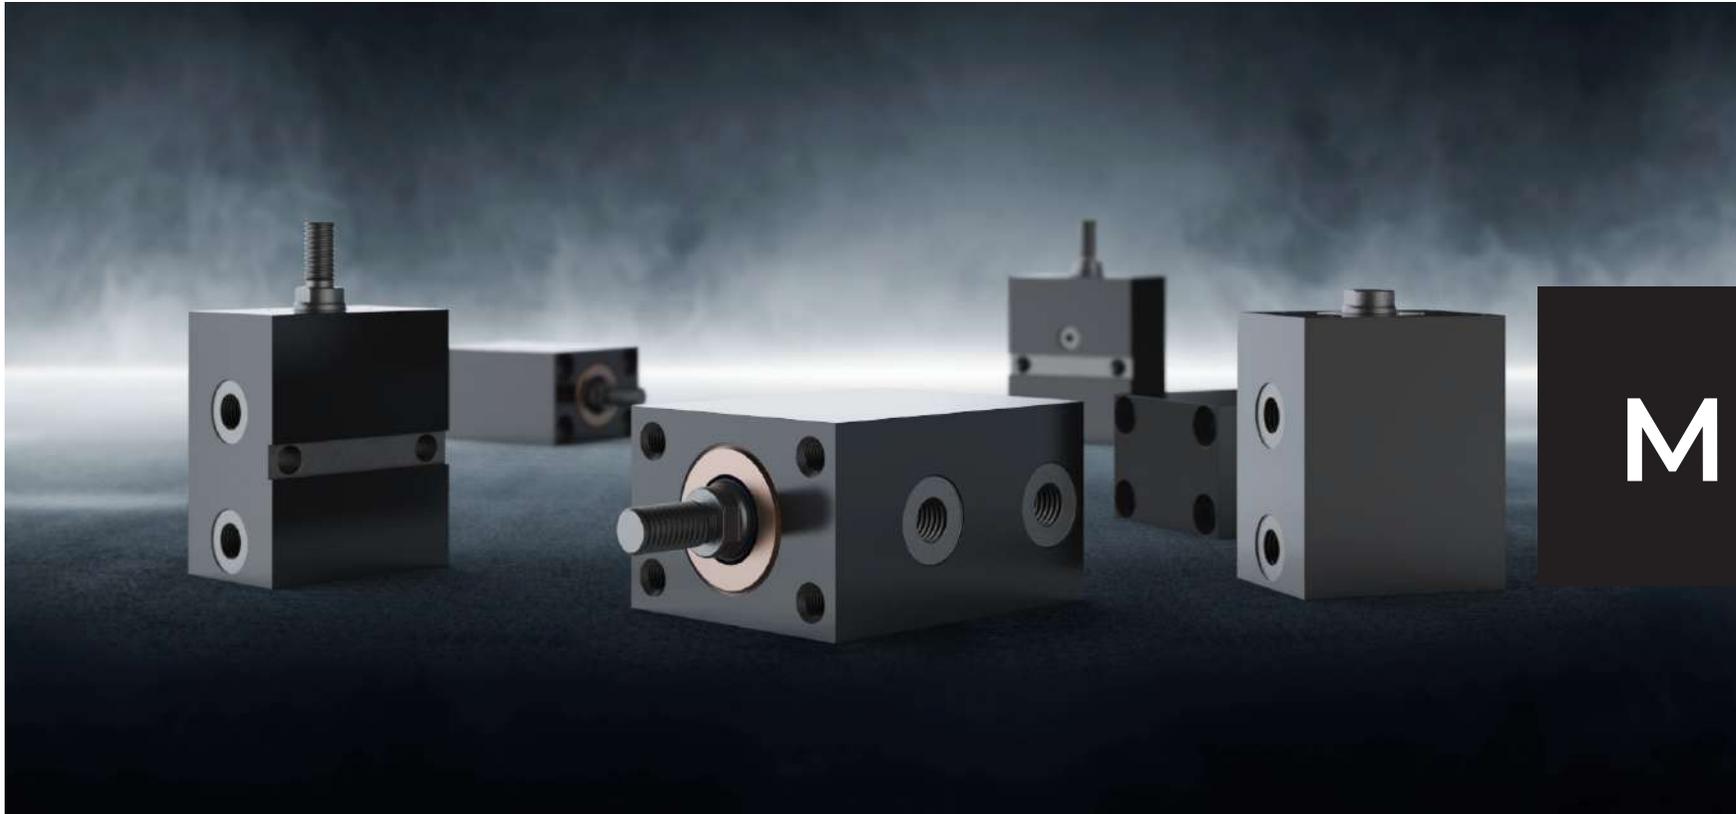

High quality Chrome plated and ground shaft.
Long-lasting friction resistance.

Yüksek kalite, çatlak kontrol sertifikalı çelik.

High quality , crack control certificate steel.

MC14

Blok Silindir / Block Cylinder

Piston Çapı / Bore : $\text{Ø}25 - \text{Ø}100$

Mak. Çalışma Basıncı / Max. Working Pressure : 0 – 500 Bar

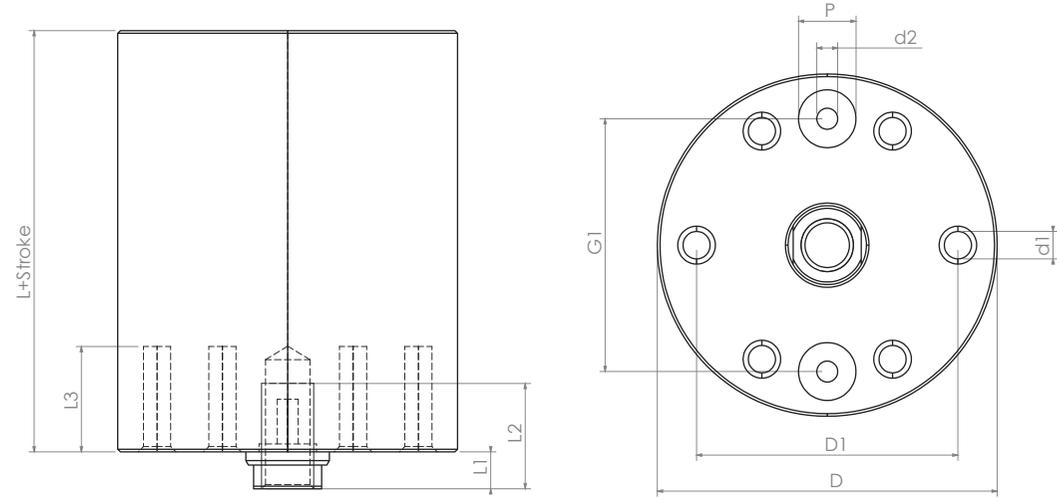

Sızdırmazlık / Sealing : Nbr – Pu – Viton

Stroke (Opsiyon Mevcut / Option Available) : 10mm – 200 mm
